

Tahoe Wildlife Forum

January 28, 2010 / 6 to 9 pm

Tahoe Center for Environmental Sciences (TCES)

The Tahoe community is invited to attend the Tahoe Wildlife Forum, including films and a panel discussion, on Thursday, January 28, 2010 from 6 to 9 pm, at the Tahoe Center for Environmental Sciences (TCES) at 291 County Club Drive in Incline Village, Nevada. The films begin at 6:00 pm and the community forum/panel discussion will follow.

This event is hosted by the Tahoe Center for Environmental Sciences (TCES), the Parasol Environment Team, and Incline Village General Improvement District Waste Not Programs.

The Following Films Will Be Screened:

"Bears of Sequoia"
(42 Minutes)

This film documents the life of the American Black Bear and shows what happens when bears and humans come together. Featured at the Lodgepole Visitor Center in Sequoia National Park, this film includes a cast of over 50 different bears found throughout the park and presents the solid waste management strategies undertaken to reduce conflict.

"American Coyote – Still Wild at Heart"
(30 Minutes)

This compelling short film produced by San-Francisco based filmmaker, Melissa Peabody, is a virtual case study of the coyote's natural range expansion continent wide. While the film unfolds with the return of coyotes to the San Francisco Bay area, it pursues the coyote's story across the North American landscape—from Northern California to New York City's Central Park to Chicago, and points in between.

A panel discussion will follow. The tentative panel lineup includes:

Madonna Dunbar, IVGID Resource Conservationist

Rebecca Sawyer Williams, IVGID Resource Conservation Technician

Ann Bryant, Director of the BEAR League

Cheryl Millman, Director of the Lake Tahoe Wildlife Center

With additional anticipated representation by the Nevada Department of Wildlife, Washoe County Sheriff's Department, and Washoe County Community Outreach.

This event is presented by the Parasol Environment Team. For more information contact: :
