

ABOUT THE UC DAVIS TAHOE ENVIRONMENTAL RESEARCH CENTER (TERC)

The Tahoe Environmental Research Center (formerly the Tahoe Research Group) is a year-round UC Davis program of research, education and outreach in the Tahoe Basin.

TERC's activities are based at permanent research facilities in the Tahoe Basin and at the university's main campus in Davis, Calif, about 90 miles west of the lake.

Our main laboratories and offices are located on the campus of Sierra Nevada College in Incline Village, Nev., on the third floor of the Tahoe Center for Environmental Sciences Building. On the first floor, we operate the Thomas J. Long Foundation Education Center, a learning resource that is free and open to the public.

In Tahoe City, Calif., we operate a field station (formerly a state fish hatchery) and the Eriksson Education Center. Tahoe City is also the

mooring site for our two research vessels, the John LeConte and the Ted Frantz.

Our secondary laboratories and offices are located on the UC Davis campus at the Center for Watershed Sciences.

Our website (terc.ucdavis.edu) has more information about our programs, including:

- Information for potential students, staff, faculty, and research collaborators;
- Access to near-real-time meteorological data gathered by our network of sensors;
- A list of publications;
- Exhibits and events at the Education Centers; and
- Information about supporting our research and teaching programs.
